PRODUCT DATA SHEET

RWT-2000T

RUST PREVENTATIVES & REMOVERS

RWT-2000T is designed specifically for the protection of locomotive cooling water systems against rust, corrosion and scaling.

PRODUCT FEATURES:

- Non-corrosive
- Prevents corrosion to metals found in locomotive cooling systems.
- Exceeds ASTM D1384 specifications, with EMD modifications.
- Contains a leak tracer dye (Phenolphthalein).
- Safe to use and dispose.

USE INSTRUCTIONS:

Add **RWT-2000T** at the rate of 2.5 ounces per gallon. Product concentration can be monitored by color level, conductivity or nitrite titration. RWT-2000T does not contain ethylene glycol. RWT-2000T is compatible with antifreeze solutions (ethylene or propylene glycol based).

TECHNICAL DATA:

pH (use level)	11
Color	Dark Red
Odor	Mild
Solubility	Complete
